

LIFESPAN INTEGRATION

CONNECTING EGO STATES THROUGH TIME

Welcome to Workshop Level I and Level II 8-11 of April 2011,
in Lifespan Integration, Stockholm with Peggy Pace, Master of Arts,
Licensed Mental Health Counselor, Licensed Marriage and Family Therapist.

Lifespan Integration is a gentle therapeutic method which heals without re-traumatizing and relies on the innate ability of the body-mind to heal itself. Peggy Pace originally designed Lifespan Integration therapy for adult survivors of childhood abuse or neglect. She soon found that LI therapy facilitates rapid healing in people of all ages, and is effective with a wide range of therapeutic issues. Lifespan Integration is useful when working with children, adolescents, adults and couples.

The workshop is open for psychotherapists with basic or higher education or psychotherapists with other education or experience that is valued as equal.

Level I, 8-9 of April 2011, 9-17.30

This workshop will provide participants with the skills they need to begin using the basic Lifespan Integration protocol with their clients. After completing this workshop, therapists will be able to use LI to help their clients with attachment issues, anxiety disorders, difficulties with affect regulation, with self esteem and with most other current issues which are related to a history of abuse or neglect in childhood.

Level II, 10-11 of April 2011, 9-17

Advanced Lifespan Integration workshops are for therapists who have completed the Workshop Level I. The Advanced Lifespan Integration workshop is designed to provide participants with the skills they need to begin using variations of the Lifespan Integration protocol to treat more complicated disorders including depression, PTSD, dissociative identity disorder, attachment disorders, bulimia and anorexia.
